##### # Case 1 (Proposed by the Board of Directors)

###### **Proposal:**

The Company and LEXTAR intend to jointly convene the conversion of the shares to have the newly incorporated company “ENNOSTAR Inc.” acquire 100% shares of both the Company and LEXTAR, the Company and LEXTAR will delisting from the Taiwan Stock Exchange (hereinafter as the conversion of the share), it is proposed to approve the shares conversion and the joint stock exchange agreement and its amendment to the agreement.

###### **Explanation:**

1. In light of the trend of Mini LED and Micro LED application, in order to scale up the business to advance the performance and competitiveness and enhance the best interests of shareholders, the Company contemplates entering into the Joint Stock Exchange Agreement and the Amendment (Please see Attachment 2 (P.22 ~ P.50)) with LEXTAR Electronics Corp. ("LEXTAR"), pursuant to which the Company and LEXTAR will jointly conduct a share swap, and will apply for setting up a new company “ENNOSTAR Inc.” (“ENNOSTAR”), which will acquire 100% issued shares of the Company (including common stocks previously issued through the private placement(s)) and LEXTAR respectively via such share swap. After the completion of the share swap, both the Company and LEXTAR will, simultaneously, become wholly-owned subsidiaries of ENNOSTAR, and the Company and LEXTAR will be delisted from the Taiwan Stock Exchange and the ENNOSTAR will be listed in accordance with the applicable laws and regulations. Subject to the approval by the shareholders' meeting of the Company and LEXTAR respectively, the Company and LEXTAR will cease its status as a public company after the completion of the share swap. To the extent permitted under laws and regulations, the practice of the competent authorities and the Taiwan Stock Exchange, each of the Company and LEXTAR will be delisted from the Taiwan Stock Exchange and cease its status as a public company on the record date of the share swap; and all common shares to be issued by ENNOSTAR will be listed and traded on the Taiwan Stock Exchange from the same date. The daily price fluctuation limits for initial listing of common shares of ENNOSTAR on the record date shall be calculated based on the second paragraph of Article 59 of the Operating Rules of the Taiwan Stock Exchange Corporation by the following reference: the price arrived at by multiplying (the closing price on the last trading day of the common shares of EPISTAR) by (the number of EPISTAR shares required for exchange of one ENNOSTAR share). (the "Proposed Share Swap")

2. Shares conversion rate

After due diligence by experts, lawyers and accountants, the shares conversion ratio, which is agreed to have 1 common stock of the Company exchanged for 0.5 common stock share of ENNOSTAR and 1 common stock of LEXTAR for 0.275 common stock share of ENNOSTAR, is the consideration of strategic merger premium after taking into consideration of the market value, net asset value, current operating status, unexpected new business opportunities, and operating comprehensive synergies of the two companies. The audit committee also refers to the independent experts' reasonable opinions to conclude that the planning and trading of the conversion of the shares are carried out by relevant laws and regulations and should be fair and reasonable, so the shares conversion ratio is reasonable.

Consideration of strategic premium M&A:

One of the important strategic consideration regarding the company cooperates with LEXTAR is to establish an investment shareholding company, by that will brings critical strategic customers from downstream such as AU Optronics Corp. and Cree Inc., which will adds up the export of the company's products. In the long run, it will increase the company's revenue, profitability and shareholders' equity.

In addition, the merge premium rate during the list company from 1985 to 2008 is between 31.5% to 62.3%, which average rate is 42.1%, according to the expert's opinion and M&A statistics. By considering the Market approach method, Price-Book ratio method and Calculating stock exchange ratio range, the range of the shares conversion ratio of Lextar and the Company on the valuation date is 1:0.461~0.597. According to the average price of shares in the past year, the exchange ratio between the Company and LEXTAR is about 0.525. Therefore, the conversion ratio between the Company and LEXTAR is 0.55, which is a reasonable strategic and premium consideration.

It is contemplated that the share swap ratio of the Proposed Share Swap should be based on the consolidated financial statements as of March 31, 2020, as reviewed by the certified public accountants ("CPAs"), of the Company and LEXTAR, and taking into account various factors such as future operating synergy (please refer to below explanations), as well as the opinion of the independent experts (please refer to the Attachment 3 from P.51 ~ P.71).

The future operating synergies are as below:

The Company chose to cooperate with LEXTAR is because LEXTAR has stepped into the upstream, middle, and downstream of the LED industry. It not only has technical talents in various processes and optomechanical thermal integration but also has well connected to downstream customers and advantages close to the end application market. In the future, after deepening the cooperation between the two parties, the Company will become an important chip strategic partner of LEXTAR and LEXTAR will focus on the development of packaging and module product technology to provide more immediate services to the end-customers for the international market.

The two parties carry out resource integration and implement professional division and cooperation. The Company will continue to focus on the upper and middle streams of the LED industry and LEXTAR will become one of the Company's important customers. LEXTAR will focus on downstream of the LED industry and the Company will become one of LEXTAR's important suppliers. As well as improvement of the interests of the employees and shareholders of both parties will have long-term positive contributions to customers, suppliers and consumers.

We have to not only win out in the competition of LED display technology for new applications but also widen the gap to be ahead of other competing technologies within the shortest time. At this critical moment, the companies in LED industry need to cooperate to focus on the use of resources to the blueprint of product and technology development roadmap to speed up the transition from R&D to mass production, to avoid repeated investment and reduce costs to maximize benefits.

By accelerating the expansion of Mini / Micro-LED applications, so that customers, suppliers and consumers can all share the benefits of resource integration, which not only helps the development of the overall supply chain, but also creates greater room for growth, and consumers can quickly enjoy the benefits of LED miniaturization and improve the quality of life.

The Company and LEXTAR will become 100%-owned subsidiaries of ENNOSTAR. ENNOSTAR will make the most effective use of resources in the future and planning strategic cooperation in the industrial chain macroscopically to be the cross-border investment platform in III-V semiconductor industry. The Company and LEXTAR are still independently operating companies. The employees and customers of the two companies will not be affected. In addition to continuing to invest in the existing

businesses of the two companies, they will strengthen their investment in the Mini / Advanced technologies in the fields of Mini/Micro-LED displays, smart sensing, and III-V semiconductor microelectronic components to enhance international competitiveness.

### III. The joint stock exchange price and description of its reasonableness

The considerations in this stock exchange case are paid by having 1 common stock share of EPISTAR exchanged for 0.5 common stock share of the newly incorporated holding company. EPISTAR's shareholders will transfer all the issued shares to the newly incorporated holding company. In addition, 1 common stock share of Lextar will be exchanged for 0.275 share of the newly incorporated holding company. Lextar's shareholders will transfer all the issued shares to the newly incorporated holding company. EPISTAR and Lextar will become 100%-owned subsidiaries of the newly incorporated holding company upon the completion of this case. The reasonableness of the considerations paid for the stock exchange between EPISTAR and Lextar is valued as follows:

#### (I) EPISTAR and the newly incorporated holding company

1. EPISTAR's shareholders use all EPISTAR common stock shares held by them on the stock exchange date as considerations for the subscribed common stock shares of the newly incorporated holding company for its incorporation. EPISTAR will become the 100%-owned subsidiary of the newly incorporated holding company upon the completion of the stock exchange. The shareholders of EPISTAR will then become shareholders of the newly incorporated holding company. The equity of the original shareholders will not be affected by the stock exchange ratio.
2. According to EPISTAR's financial report reviewed by an accountant on March 31, 2020, the equity of the owners of the parent company was NT\$43,812,626 thousand with a total of 1,088,701 thousand shares issued. The number of shares outstanding at the end of the period was 1,078,336 thousand shares and the book value of the common stock share was NT\$40.63 per share. One common stock share of EPISTAR can be exchanged for 0.5 common stock share of the newly incorporated holding company. A total of 544,351 thousand common stock shares of the newly incorporated holding company were received in exchange for the total number of issued shares on the stock exchange date. The net book value per common stock share received that was calculated according to the owners' equity of the parent company of EPISTAR would also be increased at a ratio of 1:0.5. Based on the owners' equity of the parent company of EPISTAR on March 31, 2020, the net value per common stock share of the newly incorporated holding company was NT\$81.26. For the shareholders who held the common stock shares of the newly incorporated

holding company, the owners' equity is not impaired by the stock exchange ratio.

3. The net value of the owners' equity of the parent company of EPISTAR on the actual stock exchange date was different from the net value of the owners' equity of the parent company on March 31, 2020. However, the proceeds from the common stock shares subscribed for the incorporation of the newly incorporated holding company was based on all EPISTAR common stock shares held by EPISTAR shareholders on the stock exchange date as consideration, which had been exchanged to the common stocks of the newly incorporated holding company. Therefore, for shareholders who hold the common stock shares of the newly incorporated holding company after the stock exchange, their shareholders' equity is not affected by the stock exchange transaction.

(II) Lextar and the newly incorporated holding company

When calculating the value ratio between Lextar and the newly incorporated holding company on the valuation date, the stock exchange ratio between the newly incorporated holding company and EPISTAR is 0.5:1 per common stock share, so it is proposed to use the value ratio of Lextar and EPISTAR to indirectly deduct the value ratio between Lextar and the newly incorporated holding company in order to calculate a reasonable range of stock exchange ratio.

1. Selection of valuation methods

The value of the company is relevant to the equity price. There are many ways to evaluate the value of the company. The current valuation task can be carried out in the following manners:

•Liquidation value method

In terms of liquidation value method, when the company operates poorly with high amount of liabilities that prevents the company from continuing to operate, the company's assets cannot be sold at a regular market price, and the company and some or all of the company's assets must be sold at a very low price, then the sale value is the liquidation value. Due to the consideration of expanding the scale of operation in order to improve the operational efficiency, the company in this case will continue to operate in the foreseeable future; also, there is no

evidence found that may cause the company cannot continue to operate; therefore, the liquidation value method is not applicable in the current valuation case.

•Refer to the equity transactions record of the valued company

Since Lextar and EPISTAR are both listed on the Taiwan Stock Exchange and traded in the market, their reasonable value can be deducted from their trading prices in the stock exchange market. This method is applicable for this valuation case.

•Price-Sales (Earnings) ratio method and Price-Book Ratio (hereinafter referred to as the market approach)

Price-Sales (Earnings) and Price-Book Ratio method are also known as “market approach.” The Price-Sales (Earnings) and Price-Book Ratio method are applied to discuss the company’s equity sales price and the company’s various Price-sales (Earnings) indexes, such as: operating income (P/S), net income (P/NI), earnings before tax and interest (P/EBIT), and net worth of shareholders’ equity (P/B). This valuation method is applied to analyze the ratio of the equity market price of the leading companies in this industry to each operating income, and then further evaluates the company’s overall corporate fair value and fair value per share. This method is applicable to this valuation case, so the valuation is planned according to this method.

•Discounted cash flow method

The equity of Lextar and EPISTAR is traded on Taiwan Stock Exchange. According to Article 6 of the “Regulations Governing the Publication of Financial Forecasts of Public Companies: “When a public company, in a manner other than as provided in these Regulations, provides operating revenue or profit forecast information to news, magazine, radio, television, Internet, or other mass media, or announces such information at a meeting to present business performance, news conference, or other venue, the Financial Supervisory Commission (FSC) may require the company to publish a complete financial forecast in accordance with the provisions of Chapter III”, Lextar and EPISTAR financial forecast information for future years is not available on the market; therefore, the current valuation is not applicable.

•Price-Book Ratio method

The company's value is measured according to the amount on the company's balance sheet. The net value per share is calculated according to the financial values attributable to the owners' equity of the parent company and the common stock shares outstanding in the most recent year on the financial statements. It refers to the remaining value of the company after the sale of all assets and liquidation of all debts owed to the creditors. Conceptually, it is an amount that can be allocated to each shareholder (common stock shareholder) by the company. The company's future profitability or business cycle is not included for consideration. It is more suitable for companies, newly incorporated companies, or traditional companies that attach importance to the asset value. The information can be obtained easily, so this valuation is used as a reference.

2. Value calculation - refer to the equity transactions record of the valued company

Because both parties of the transaction, EPICSTAR and Lextar, are listed companies with objective market transaction prices for reference, the company's transaction price in recent years is sampled in this opinion report. In addition, EPICSTAR participated in global depository receipts with cash capital increase, as of March 31, 2020; there were 6,023 units outstanding, which represented the 30 thousand common stock shares of EPICSTAR. Due to the small quantity of stock share outstanding, the market value will not be calculated independently based on the materiality principle. The average closing price of the 10, 30, 60, 90, and 180 business days before May 31, 2020 (inclusive), the valuation date, are listed as follows:

### 3. Value calculation - market approach

#### (1) Selection of comparison companies

When evaluating the fair value of an enterprise in accordance with the law of multiple proportion, the industry category, product classification and profit ratio, market competitive position, company profitability, professional ability of the management team and employees, company equity structure, and the company's internal control capabilities of the selected comparison company are all important factors for enterprise valuation.

Based on the aforementioned characteristics and risk considerations, and considering the fact that both parties of this transaction are in LED industries, EPSTAR focuses on upstream, the production of Epi and Chip, while Lextar engages in the midstream, packaging, and gradually expands into downstream and upstream. The relevant listed companies in Taiwan are selected for comparison. Please refer to Table 3.1 for the introduction of the comparison companies:

Note 2: The average and median are analyzed based on the aforementioned values to facilitate subsequent valuation operations and it is for reference only.

### (3) Value calculation - market approach

Multiply the operating (earnings) revenue data and the shareholders' equity of EPISTAR and Lextar on December 31, 2019 by the aforementioned comparison company's operating (earnings) multiples

(detailed in Table 3.2) to derive the fair value of the overall equity of EPISTAR and Lextar on December 31, 2019. According to the compiled data in Table 3.2, due to the significant variation of the multiple proportion value of the comparison companies, if the average value is used as a reference for the multiple proportion, the market multiple proportion level could be distorted due to the influence of the extreme values, so the median is adopted for reference regarding multiple proportion in this valuation.

#### (4) Value calculation - stock price fluctuation and adjustment

When the equity value is evaluated with the market approach and when the financial information of the comparison company is different from that of on the valuation date, the stock price fluctuations during this period must be adjusted. (5) Value adjustment and judgment

I. Adjustment of strategic M&A premium

In the corporate merger and acquisition market, the acquirers often acquire objects with synergy at a strategic price higher than the market price. Acquirers can use their existing market, technology, or management advantages to create more future revenue flows for the merged companies after the mergers and acquisitions in order to form a comprehensive M&A effect. According to the book “Corporate Valuation Practice” by Professor Yimao Chen, the statistics of Mergerstat Review indicate that the premium for mergers and acquisitions of listed companies from 1985 to 2008 was between 31.5% and 62.3% with an average of 42.1%.

For the current valuation, it is planned to exchange 1 common stock share of Lextar for 0.275 common stock share of the newly incorporated holding company. Lextar will transfer all the issued shares to the newly incorporated holding company. The acquirer is a newly incorporated holding company. In order to obtain the synergy effect of mergers and acquisitions, it is planned to acquire Lextar at a price higher than the market price. Therefore, the current valuation is intended with 31.5% adopted as a reference for the strategic merger premium.

II. Adjustment of marketability discount

Since the equity of EPISTAR and Lextar has been publicly traded on Taiwan Stock Exchange, for the current valuation, it is planned to exchange 1 common stock share of Lextar for 0.275 common stock share of the newly incorporated holding company. Lextar will transfer all the issued shares to the newly incorporated holding company. There is no need to adjust the marketability liquidity discount in the market approach.

III. The value adjustment process of the market approach is to have valuation results adjusted after considering the strategic merger premium; also, calculate the fair value of EPISTAR and Lextar equity on May 31, 2020. The relevant adjustment and calculation is shown in Table 3.6.

Note: The stock exchange ratio is calculated by dividing the net value of Lextar by the net value of EPISTAR in each period.
